

ROADMAP FOR ADVANCED METERING STANDARDS

FORUM #1

Standards Australia will be facilitating a Roadmap for Advanced Metering throughout 2016. The work is designed to support the safe and efficient roll out of smart meters in Australian cities and communities as the country progressively transitions to a smarter economy.

Over the course of a number of years there have been technological developments relating to metering equipment. The International Electrotechnical Commission Technical Committee 13 (IECTC 13 Metering Equipment) has already developed a series of standards that incorporate these technological advancements.

However, the existing Australian Standards for metering date back to 2006. It is now necessary to update our standards to accommodate advancements in technology.

As a result, a number of key proponents including Vector, Origin, the Energy Networks Association, Landis+Gyr and EDMI are working with Standards Australia to lead efforts to develop a Roadmap for Australian Advanced Metering standards.

The Roadmap, through a series of forums to be held in 2016, will afford industry and government stakeholders the opportunity to assess the current Australian Standards and to identify relevant international standards for use in Australia. The Roadmap will ultimately work toward the development of a work program and priority list of new projects that will ensure that all Australian Standards for metering equipment are up to date and can facilitate integration into the smart grid.

The Roadmap will consider a number of important metering issues including safety, tariffs and load control, testing, Australian community expectations, temperature ranges and other relevant issues.

All relevant stakeholder groups are welcome to participate in the Roadmap. Participants will have the opportunity to join the discussion after the presentations.

Views expressed during the discussion will assist in the shaping of future standards development work in this important technology area.

WHEN/WHERE

Thursday 3 March 2016

Standards Australia

Level 10, 20 Bridge Street, Sydney

10:00 am to 2:00 pm

Registration from 9:30 am

Light lunch to be provided – please advise of any specific dietary requirements by RSVP.

RSVP

This is a complimentary

forum and places are limited.

To confirm your attendance, please

RSVP by Friday 19 February to

nsm@standards.org.au providing

your name, organisation and email

address details.

ENQUIRIES

Varant Meguerditchian

Senior Manager, Stakeholder Engagement &

Public Affairs

02 9237 6119 or
