

ANTI-LIGATURE/ ANTI-HARM HARDWARE FORUM

THURSDAY 11 AUGUST 2016

Are you a professional that works in a mental health care facility?

Are you an architect that designs within an institution setting?

Do you manufacture or supply components for use in specialised facilities?

If you answered yes to any of the above, Standards Australia invites you to participate in a discussion on anti-harm devices for specialised institutions. Specialised institutions may include prisons, public and private psychiatric hospitals, psychiatric units or wards in public acute hospitals, community mental health care services, and government-operated and non government-operated residential mental health services.

Together with the Architectural Door Hardware Association, Standards Australia will be facilitating a discussion on whether standards are required for anti-ligature and anti-harm hardware components. We invite you to hear from some professionals in the industry and participate in a scoping exercise.

WHEN/WHERE

Thursday 11 August 2016

Melon Room

Mercure Melbourne Treasury Gardens

13 Spring Street

Melbourne

2:00 pm to 4:30 pm
