

FORUM: BUSINESS ETHICS FOR ENGINEERS

TUESDAY 17 MARCH 2015

The technical experts who work on Standards Australia committees are often engineers from a wide range of disciplines and Standards Australia cooperates closely with key engineering partners, Engineers Australia and The Warren Centre for Advanced Engineering. This event is an opportunity for professionals from across our three organisations to come together to share discussion of business ethics for engineers.

Professional engineers should always behave in an ethical manner. But what are 'ethics' and, indeed, what is 'professional', and how can we ensure we are always ethical in a changing and ruthless business world? This talk will explain what we mean by 'ethics' and 'professional' and emphasise the importance of business ethics.

SPEAKER: PHIL HOPKINS

Dr Phil Hopkins is an independent consultant. He was previously Executive Director of the pipeline engineering company Penspen Limited., UK, and Managing Director of the pipeline engineering consultants, Andrew Palmer and Associates. Phil was also Professorial Fellow and Visiting Professor at Newcastle University, UK, and teaches on Masters programmes at both Newcastle University, and Northumbria University, UK.

SUPPORTED BY

WHEN/WHERE
