For further information please contact

For IEC: Katharine Fraga kpe@iec.ch

For ISO: Belinda Cleeland cleeland@iso.org

Learn about the many ways in which International Standards can support public policy goals at this IEC and ISO conference and training course! We will look at how to reference standards in regulations, how standards can help implement policy commitments taken at the global level (e.g. sustainability, resilience and development goals), and much more.

The event is a unique opportunity to connect national and international policymakers with standards developers, in order to share experience and best practices. So bring your national policymakers with you!

More information on the programme and registration will follow. To learn more on how standards can help you: [‘Using ISO and IEC standards to support public policy’](#).
