ENQUIRIES

Any enquiries may be directed to Kareen Riley-Takos, National Sector Manager by email kareen.riley-takos@standards.org.au or on 02 9237 6047.

In June 2011, the Australian Department of Resources, Energy and Tourism (RET) commissioned Standards Australia to identify the need for Australian Standards to support the near-term commercialisation of smart grids in Australia.

This request arose as a result of the Department's facilitation of the *Smart Grid, Smart City* project being undertaken in New South Wales, and ongoing international discussions about the need for standards to support the development of smart grids around the world.

Following a detailed and robust process undertaken in the past year, Standards Australia, together with the Department of Resources Energy and Tourism, is pleased to invite you to the launch of the final report titled *Australian Standards for Smart Grids – Standards Roadmap*.

During the launch there will be an opportunity to be briefed on the progress of the *Smart Grid, Smart City* project and the process undertaken by Standards Australia and Rare Consulting in developing the roadmap and arriving at its recommendations. Standards Australia will also discuss the next steps concerning standards development.

The *Australian Standards for Smart Grids – Standards Roadmap* will be released prior to the event.
