## **VALE MR RON COLLIS**

It is with great sadness that we acknowledge the passing of Ron Collis, a notable contributor to standards development and the field of electrotechnology and energy.

Ron was a major supporter of national and international standards, while promoting the value of standardised conformity assessment solutions to prevent wasteful duplication of testing and certification practices.

Ron was a member of the Standards Australia Council and represented the Australian Industry Group on national standards committees. In his time working with Standards Australia Ron chaired Australian committees and participated in many international delegations.

In addition, he was highly involved internationally as a member of the Australian National Committee to the IEC and Chairman of the IECEE Conformity Assessment System's Management Committee. He also served for six years on the IEC Conformity Assessment Board.

Ron was a loyal employee of Rockwell Automation for over 25 years, with his most recent role focusing on standards, regulation and compliance.

On behalf of the staff, members and contributors to the standards development process, we send our sincere condolences to Ron's family at this difficult time.
