

# Forum for Bitumen Standards CH-025 'Bitumen and related products'

## Bitumen Standards

Standards Australia technical committee CH-025, Bitumen and related products (for roadmaking), has been developing standards for bitumen specifications and test methods for over 40 years. With a sealed road network over 330 000 km in Australia, the maintenance of this catalogue of standards is essential to ensuring the quality and continued safe and sustainable production and use of bitumen. This is essential for maintaining and further developing our expansive road network.

Standards Australia has received project proposals to revise a number of the standards within the committee's portfolio. To progress these proposals, Standards Australia will facilitate a forum to discuss the scope and revision approach for each proposed project.

This forum will address the following Standards:

- **AS 2341.3: 1993** - Methods of testing bitumen and related roadmaking products - Determination of kinematic viscosity by flow through a capillary tube
- **AS/NZS 2341.12:1993** - Methods of testing bitumen and related roadmaking products - Determination of penetration
- **AS 2341.18: 1992** - Methods of testing bituminous and related roadmaking products - Determination of softening point (ring and ball method)
- **AS 1160: 1996** - Bituminous emulsions for the construction and maintenance of pavements

Standards Australia would like to invite all interested stakeholders to participate in this forum event.

## WHEN

Tuesday, 28 November 2017  
10:00 am to 3:00 pm  
Registration from 9:30 am

## WHERE

Clifton's Melbourne  
Level 1, 440 Collins Street  
Melbourne, VIC

## AGENDA

1. Discussion of proposed revisions
2. 'Adoption by reference' approach
3. Open discussion on Scope and approach
4. Next steps

## RSVP

To confirm your attendance, please register at
